- ☐ Other: ____.

1. The disclosure is objected to because of the following informalities: It appears that some of the text is missing at the top of page 9.

Appropriate correction is required.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants are advised that a pronounced inward ridge on line 2 of claim 17 appears to be a double inclusion of the inward ridge set forth on line 12 of claim 15.

3. Applicant is advised that should claims 6 and 7 be found allowable, claims 16 and 17 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 9, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Valyi '937.

Note the blow molded bottle 50 of Valyi having a pair of opposed grip recesses at 60. Valyi defines the walls of the recess as arcuate and clearly convex as shown at 55. The inward ridge is shown at 61 in Figure 5.

5. Claims 2, 3 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Haney et al '167.

To have formed the recess with a pattern or gripping grooves in the manner taught by Haney et al would have been obvious to one having ordinary skill in the art.

6. Claim 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Krishnakumar et al '105.

To have formed the recess with the depth or inward depression claimed would have been obvious in view of such teaching by Krishnakumar et al.

7. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 15 and 18-20 are allowed.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miura, Schneider, Lawrence and Ota et al show other gripping recesses.
